**Education For All Development Index (EDI):** The EDI is the arithmetic mean of its four components- total primary NER, adult Literacy rate, GEI and survival rate to grade 5.

Since the components are all expressed as ratio, the EDI value can vary from 0 to 1. The closer a country's EDI value is to the maximum, the greater the extent of its overall EFA achievement and the nearer the country is to the EFA goal as a whole.
